

Forklift Electrical Part

Electrical Parts for Forklifts - Lift trucks can be purposely labeled to be used in hazardous places. A labeled truck denotes the design has met the minimum standards of ANSI/UL 558 for engine powered forklifts or ANSI/UL 583 utilized for electric lift trucks for the type of label put.

The application for labels used for lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas or Use, Maintenance and Operation, and Type Designations. Ask your local insurance provider and Fire Marshall for further info about the approved uses of industrial powered trucks in your application.

If the specific forklift meets the outlined standards, labels may be put. A labeled forklift will show the type of designation located on the nameplate and will have a correctly corresponding label put.
