Clark Totalift has a really amazing global support network. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is currently a standard feature on every lift truck.

Clark has a continual mission to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental limitations, thus placing them in a dominant market position.

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants because this technique is particularly economical and enables minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most effective ways for manufacturing facility stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers join together to develop the efficiency and excellence of their merchandise while minimizing costs. The contemporary value engineering program combines modern product development and delivers improved consumer support and service within the industry.
