

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational organization consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Technologies and Machine Instruments and Computerization Systems.

Their United States affiliate, Doosan Infracore America Corporation, stationed in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, San Francisco houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer wishes.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving forklift supplies and materials handling equipment. This system helps Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line remarkably features 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest rising forklift and lift truck company in the North American marketplace, thanks to its outstanding level of product performance and their persistently high level of client support and service given to all Doosan Infracore Forklift clients. The U.S. forklift division based in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a nationwide machinery expansion venture. Early product sales of this industrialized equipment focused on large business communities, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a situation of substantial expansion of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to respond to competitive pressures in the US materials handling market. This project greatly expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a contemporary plant which helped launch the business for the manufacture of high end added-value goods suited for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
