

Aerial Work Platforms

Aerial Work Platform - There are a variety of lift truck attachments offered on the market. They can help transform your forklift so that you can expand your ability to pick things up or complete clean up tasks and material handling with out difficulty.

Several of the attachments are specially designed to fit on the blades themselves. Fork extensions for instance, are utilized if you require much more blade length, which increases lifting capacity. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are one more kind used when transferring rolled material in order to make sure it does not roll off of the traditional flat forks.

Examples of lifting attachments include pivoting and telescoping boom or crane attachments. They can come in a number of different styles and are normally utilized for moving lumber, poles, metal bars and various types of bulky items. Additional attachments like different styles of hook plates and hooks are accessible in order to pick up items utilizing a sling or chain. Slab lifters and magnetic filters are other things which can be utilized together with hook accessories. Slab lifters are specialized accessories which are meant for carrying a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift to make transferring rolls of carpet much easier. The accessory hooks onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are several kinds of forklift accessory used for facility maintenance such as snow blades. These industrial forks can be attached to front end loaders and intended for moving materials like for instance dirt, and mulch as well as snow. Other common cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift blades connect onto for sweeping big spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up effortless and fast.

A material spreader is another lift truck accessory that is usually utilized at facilities. These spreaders are handy for a range of applications like for example spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting attachment which many companies make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models offered which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location using the forklift. Larger platform units have added space for workers so as to carry tools and other necessary stuff for the task. Usually work platforms are made of poly material or steel.
